Excerpts from ODP Div/Staff Reports for Week Ending 10 December 1982

Management	
Optical Disk Memory Product Briefing. Burroughs Corporation provided interested Agency components a briefing on the status of their optical disk memory product development. The briefing, which was sponsored by ODP, was well attended by a cross section of Agency components. The briefer was Mr. Solomon Ebrahim, the Manager of Market Analysis and Planning, Optical Memory Engineering, from the Burroughs Corporation Westlake, California, facility.	STAT

ODP 82-1763 9 December 1982

Director of Data Processing SUBJECT: ODP Report for Week Ending 10 December 1982 1. Liaison with NSA Three representatives from NSA's Data Processing Operations Group are currently visiting with Operations Division personnel. The visit is related to a planned program to exchange ideas and information between the two organizations. NSA personnel are being briefed on ODP's mission, Computer Center requirements, hardware configurations, operating systems, and observing the daily operation of Ruffing and Special Computer Centers. 2. IBM 3081 CPUs Highly Reliable The IBM 3081 CPUs have outperformed all other CPUs combined, including the Amdahls. For the II-month period of December 1981 through October 1982, all other CPUs had three times as many failures. 3. Computer Center Stairway Under Construction A pre-construction meeting with GSA, Headquarters Engineering Branch, Office of Logistics (HEB/OL), and the contractor for the stairway between the Center and the Annex in 1D16 was held on 2 December. Work Started on 7 December and the contract completion date is 16 February 1983. 4. SAFE Early Capability Activities All ADP equipment shipments remain on or ahead of schedule. Five solid state drums were delivered on 7 December.	MEMORANDUM FOR:	Deputy Director for Administration

SUBJECT: ODP Report for Week Ending 10 December 1982

6. Excess Burroughs Equipment

A meeting was held on 6 December with Burroughs Corporation representatives to discuss the status of our mutual efforts to place within the Intelligence Community the Burroughs computer systems that had become excess with the SAFE Project redirection. Three remaining B6900V systems have yet to be placed. The Burroughs Corporation was represented by Mr. Donald Cole, the SAFE Accounts Manager, and his immediate supervisor, Mr. Philip A. Schlimgen. On Thursday afternoon, 9 December, Stuart Johnson, a Vice President in the Federal and Systems Group at Burroughs Corporation, met with D/ODP on this subject.
